DETAILED ACTION

Election/Restrictions

Applicant's election of Species f (figure 9) in the reply filed on 7/29/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 5-6,22-23,34 and 45 were indicated for withdrawal by applicant from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/29/05.

Additionally, claims 4,19-21,24-33,35-39,41-44 and 46-48 include the limitation of a support device, which is not included in the species of figure 9. Instead, the support device 400 is an element of figures 6B-6C. Claims 4,19-21,24-333,35-39,41-44 and 46-48 are also withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Priority

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Please amend the priority paragraph in the specification to include the patent number of the parent application.

Application/Control Number: 10/619,265 Page 3

Art Unit: 3763

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,7-8,11-18 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Ford et al (5,681,285). Ford discloses a control unit (80) a syringe (20), plunger (34), an interface module (10), syringe interface (clamping devices, see 8:10+), and drive member (see 8:19-20). See figures 1 and 5. The device also includes a motor (see 8:50+), a power source (84), one or more devices for controlling the drive member (keyboard 16 and internal memory with drug library) and a communication line (82). As shown in figure 5, the syringe interface module is adapted to be lain next to a patient or be placed in any suitable position since it is not fixed and physically separate (other than the communication line) to any other structures. The control unit includes a housing an circuitry (microprocessor among other circuitry). The control unit has a switch (on/off switch). The device also includes a batter. See 10:23+.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine S. Williams whose telephone number is 571-272-4970. The examiner can normally be reached on Monday - Friday.

Application/Control Number: 10/619,265 Page 4

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
